# Memorandum

To H.P. Wehrenberg, Board of Works

Date Feb. 8, 1977

From Ruth Winget, Purchasing Department

Subject One - Handy Ram Pavement Breaker

## COPIES TO:

J.F. Morreale

B. Drew

Herewith is Purchase Order #8697 which is prepared favoring MacDonald Machinery Co., Inc. for one (1) Handy Ram Pavement Breaker for Water Maintenance and Service.

The Handy Ram Pavement Breaker was demonstrated for the members of the Board of Works at Lafayette and Wallace streets on February 2, 1977. This piece of equipment is very necessary in cutting time and saving the department a great deal of money. The hole cut for demonstration took 1½ hours. The same hole cut with a jack-hammer would have required six (6) to ten (10) hours depending upon operator's ability.

Two quotes were received, MacDonald Machinery Co., Inc. being the lowest at \$2,750.00 Korte Brothers quote was \$3,000.00.

Attached are the following documents in support of the recommendation for acceptance of MacDonald Machinery Co., Inc. quote:

1. MacDonald Machinery and Korte Brothers Quotes.
2. Copy of Purchase Order.
3. Memorandum from Water Maintenance & Service.
4. Memorandum from Purchasing Department.

It is urged that in referring this bid-quote to the City Council for enactment of an ordinance, that all of the attached items, together with this memorandum (or copies), be included with the proposed ordinance.

Please make sure that no confirming Purchase Order Number (s) is given to MacDonald Machinery Co., Inc. until evidence of Council approval is furnished to the Purchasing Department.

FORM 11-55

Date February 4, 1977

To: Mr. Joseph F. Morreale - General Superintendent, City Utilities  
Subject: Justification of Handy-Ram Pavement Breaker

In reference to the demonstration of the Handy-Ram that you and members of the Board of Works observed at Lafayette and Wallace on February 2, 1977, I believe and hope that you agree that this piece of equipment is very necessary in the fact that it cuts time and in turn saves the department a great deal of money.

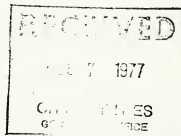

Example: The hole that was cut for the demonstration took (1½) hours. If this same hole was cut with a hammer operated by manpower, it would have taken (6) to (10) hours.

Please consider the attached purchase requisition. Thank You.

# HAMMER FOR BACKHOES AND LOADERS

- **PRODUCTION RATE:**  
EQUAL TO 9 OR MORE 90 LB.  
PAVEMENT BREAKERS OR  
3 HUGHES IMPACTORS
- **MOUNTING TIME:**  
WITH STANDARD BRACKET .15 MIN.  
WITH OPTIONAL GRIP .2 MIN.

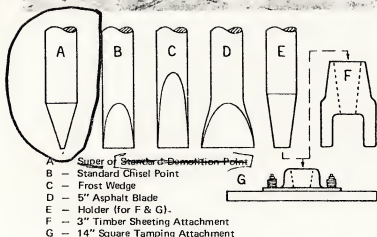

The HANDY-RAM is a very practical size hammer for breaking concrete up to about 12" thick, for shale or for frozen ground. It operates off any compressor 125 CFM or larger and uses standard 3/4" pavement breaker hose. It starts and stops automatically, is easily handled by small Backhoes or Loaders and has an assortment of tools that can be changed in one minute.

At left - The HANDY-RAM with optional HANDY-GRIP is mounted on a backhoe bucket. This combination can also be mounted on loader buckets. The fast mounting and removal times are ideal for jobs where frequent changeovers are required.

At left - The HANDY-RAM with the Standard Mounting Bracket of the HANDY-RAM is shown in the conventional dipper mounting, pin connected in place of the backhoe bucket.

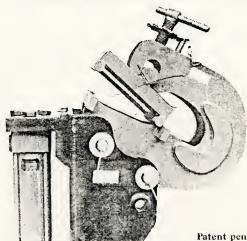

Below - The unique optional HANDY-GRIP is shown pin connected to the Standard Mounting Bracket of the HANDY-RAM. The upper clamp element self-adjusts to the bucket contour. The manual locking screw has a pin lock to prevent loosening. The HANDY-GRIP also fits some other hammers such as the Allied Model 33 and Tramac 296A.

## HANDY-RAM MODEL 125 & HANDY-GRIP MODEL 23 SPECIFICATIONS

Air Consumption (cfm)	* 125
Pressure at Hammer (psi)	90
Air Hose Size (ins.)	* 3/4
Weight with Std. Bracket (lbs.)	450
Total Wt. with HANDY-GRIP (lbs.)	675
Impact Force (ft. lbs.)	700
Blows per Minute	500
Energy per Minute (ft. lbs.)	350,000
Length Overall (ins.)	59

\* For best results, use 1" hose when using worn 125 cfm compressors.

Patent pending.

## BLADES FOR BACKHOES

PHOTO SHOWS MODEL 4  
HANDY-BLADE MOUNTED  
ON BACKHOE BUCKET.

- MOUNTING TIME;  
30 SECONDS

The HANDY-BLADE is ideal for backfilling, clean-up, fine grading, landscaping, ditch cleaning, snow removal around parking meters, hydrants or other obstructions and for a variety of other applications where reach, control and/or excellent operator visibility are essential. The HANDY-BLADE is available in two sizes, 4 ft. and 6 ft. blade. Both sizes fit buckets with teeth, from 12" to 36" width. No alterations of the bucket or adapters are needed. The HANDY-BLADE is easily attached by the backhoe operator without assistance or tools. He simply draws the bucket into the clamp opening until the teeth are under the round bar, then curls the bucket until the HANDY-BLADE slips completely on by its own weight and then manually tightens the clamping screw.

SPECIFICATIONS	HANDY-BLADE MODELS	
	4	6
Blade Width (ft.) . . . . .	4	6
Blade Height (ins.) . . . . .	14	14
Weight (lbs.) . . . . .	162	216

## ROLLER FOR BACKHOES AND LOADERS

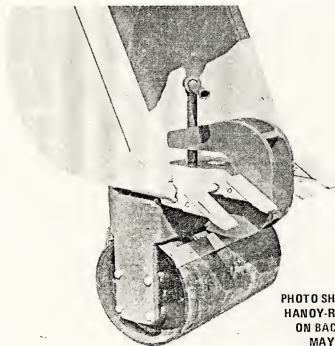

PHOTO SHOWS MODEL 12  
HANDY-ROLL MOUNTED  
ON BACKHOE BUCKET.  
MAY ALSO BE USED  
ON LOADER BUCKET.

- COMPACTION FORCE;\*  
EQUAL TO A 10 TON ROLLER
- MOUNTING TIME;  
ONE MINUTE

The HANDY-ROLL is ideal for asphalt patch, slab base and slope compaction. It saves the cost of transporting heavy equipment to small jobs—even fits in the trunk of a car. \*Compaction force can be varied to suit the application simply by applying more or less of the machine's weight. On machines weighing 12,000 lbs. and up, a Compaction Force of 300 lbs. or more per lineal inch of roll is developed. The HANDY-ROLL manually clamps over the lip of Backhoe or Loader buckets — no tools or bucket alterations needed.

SPECIFICATIONS	HANDY-ROLL MODEL 12	
Roll Diameter (ins.) . . . . .	12	
Roll Width (ins.) . . . . .	20	
Overall Height (ins.) . . . . .	26	
Net Weight (lbs.) . . . . .	290
